

Cloud Strategy & Design Workshop

A solid cloud strategy and design is an essential key to digital transformation. A flexible cloud infrastructure securely integrated with your existing IT assets is critical in extracting value from the cloud. Asperitas' Cloud Strategy & Design Workshop provides the foundation for your organization's cloud implementation by bringing your key stakeholders together with Asperitas' cloud experts

Workshop Overview

The Cloud Strategy & Design Workshop is driven by specific use cases our customers provide prior to the workshop. Customer provided use cases serve to focus the workshop discussion and lead to actionable design deliverables. Cloud strategy workshops often include many of the topics listed below, but other areas can be included by request.

Workshop Areas Addressed

Application Management

Automation

Security

Networking

Identity Management

Cost Management

Compute Management

Storage Management

Availability & Resilience

Operations

Compliance, Governance & Risk Management
